

Announcement

The Disaster Mitigation for Sustainable Livelihoods Programme (DiMP) has relocated to Stellenbosch University (SU)

At SU, DiMP will continue and expand its current suite of activities within the Department of Geography and Environmental Studies, which is headed by Professor Hannes van der Merwe (jhvdm@sun.ac.za).

DiMP's support to existing administrative and academic programmes at the University of Cape Town will continue during a phased transition to its new home. This includes support to currently registered students, as well as conclusion of Phase II of its multi-country Periperi U programme funded by USAID. This will mean DiMP will maintain a satellite office at UCT until July 2011.

DiMP is looking forward to expanding its existing portfolio of activities at SU, and building on its invaluable twelve-year collaboration with the Department of Environmental and Geographical Science at the University of Cape Town.
